Technical Data Sheet Issue date: 18/04/2023 Ver

Version: 0.0

TDS No.: TDS.23.100

1. Product Description	
Product description	: Anaerobic adhesive and sealants are advanced materials with single component and solvent free feature. The products are specifically formulated for sealing, retaining, locking and bonding of metal or metal plated assemblies. Anaerobic adhesives are stable when in contact with oxygen in air. As the product is placed between two mating metallic surfaces, where oxygen contact is vanished, polymerization starts and forms strong, vibration and pressure proof polymer layer.
Product form	: Mixture
Trade name	: PIPE SEALANT MEDIUM STRENGTH
Use of the substance/mixture	: Anaerobic adhesive (glue)
Recommended use	: Industrial use Consumer use Professional uses

### 2. Characteristics

Characteristics

: Pipe Sealant is a medium viscosity and medium strength anaerobic pipe sealant. Thixotropic formulation reduces run-off and migration of the product before assembly. It can be easily applied to threaded joints and removed easily with hand tools. With its specialized formulation, Pipe Sealant can be used applications where high pressure proof or oil resistance is required. The product resists very high pressures, after full curing.

#### 3. Application

No information available

#### 4. Application Instructions

- Clean male and female threads before assembly with an absorbent tissue paper to remove any cutting oil.
- The application surface should be dry and cleaned from dirt, dust and oil.
- Apply the adhesive with a 360 turn to leading threads of the male and female fittings.
- Use an absorbent tissue paper to wipe off excess jointing compound in the direction of the thread.
- Assembly parts and hold on for 24 hours at 22-24°C to ensure full curing of jointing compound.
- For disassembly, use hand tools to remove mating parts. When it is hard to dissemble at room temperature, apply local heat until reaching 250°C and disassemble while hot. Then, remove any residual cured adhesive mechanically and clean parts with a proper solvent, acetone.
- For further information, consult Safety Data Sheet and Technical Data Sheet.
